Look book - Before and
After projects

I would recommend Golden Mile trading for any restoration or building needs.

Jackie goes the extra mile to assist in all your requirements and needs. She ensures the work is done to the highest of standards.

She has a great passion for her work and ensures you are happy with the final product.

She ensures that she finishes on the timeline given and try not to delay. I often hear people complaining about contractors not working properly, this is certainly not the case with Jackie as she works fast, efficient and clean.

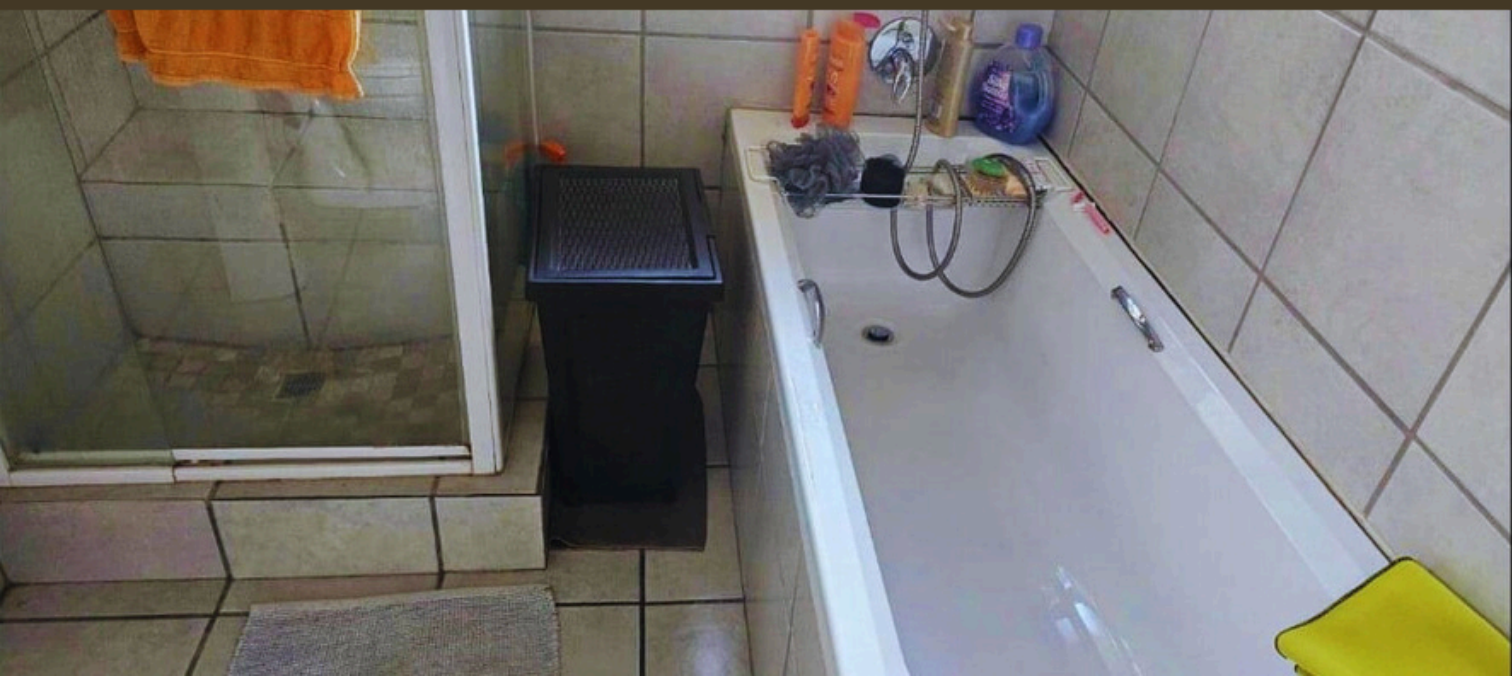

She ensures the building site is clean and that there are not any obstacles.

I would recommend Jackie for any future projects as she keeps to her word.

Before

I found Jackie from Golden Mile Trading through the BNI network.

I have had several contractors work at my house and farm, but what I appreciate most about Jackie is that she is involved from start to finish. Most contractors are not onsite and leave their staff without adequate supervision or attention to detail. I can confidently say that Jackie has a passion for completing projects and takes great pride in how she executes each task. This is rare, as many builders seem to do it purely for the money.

I would highly recommend her. In an industry full of unethical individuals, I trust her completely.
